### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest, in a method of gas-assist injection molding a hollow plastic tubular article, the steps of: providing a mold with a mold cavity having a substantially cone-shaped inlet portion, wall surfaces forming an elongated central portion and an exit portion; injecting plastic material into the mold cavity; injecting pressurized gas into the plastic material in the mold cavity; holding the pressure of the gas and plastic in the mold cavity for a predetermined amount of time; and allowing a portion of the material in the mold cavity to be expelled. Regarding claims 18, 49 and 56, the prior art does not teach or fairly suggest, in a method of gas-assist injection molding a hollow plastic tubular article, the steps of: providing a mold with a mold cavity having a substantially cone-shaped inlet portion, wall surfaces forming an elongated central portion and an exit portion; injecting plastic material into the mold cavity; injecting pressurized gas into the plastic material in the mold cavity; and allowing a portion of the material in the mold cavity to be expelled back into the barrel of the injection molding machine. FR 2,256,021 teaches a cone-shaped inlet portion, but does not teach expulsion of material subsequent to the injection of the gas.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

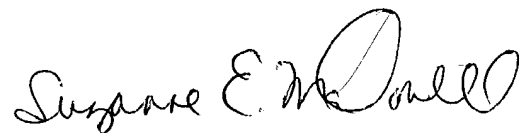

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne E. McDowell whose telephone number is (571) 272-1205. The examiner can normally be reached on M, W, Th 6:30-4.
